#### **DETAILED ACTION**

#### Amendment

1. Acknowledgment is made of Amendment and Request for Continued Examination filed March 27, 2006.

### Claim Objections

2. Claim 6 is objected to because of its dependency on claim 5, which has been canceled by applicant. Appropriate correction is required. For the purpose of examination, claim 6 is treated as a dependence of independent claim 1.

### Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 4. Claims 1-4, 6, 8-16 and 18-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Fahraeus (US 6,502,756).

Re claims 1-2, 8, 11-14, 18 and 21-24: Fahraeus teaches a method comprising receiving a piece of paper (sheet 1 in fig. 1) having a printed pattern (4, 5, 6a, 6b in fig. 1; col. 8, lines 10-22; col. 7, lines 41-65) thereon;

printing a hardcopy representation of an electronic application on the paper (i.e., printing a MENU on sheet 1 as shown in figs. 2 and 9; col. 18, line 66 through col. 19, line 4), the hardcopy representation (i.e., the MENU) having identification information (3 in fig. 9) to

Art Unit: 2876

associate the printed pattern (4, 5 in fig. 9) with the electronic application (i.e., the menu application), the identification information (3) comprising an identification icon (i.e., the alternatives, such as, "Vegetable Soup," "Smoked Salmon Toast," "Veal Oscar," etc. as shown in fig. 9) unique to the electronic application (col. 20, lines 1-10);

recording one or more edits made with a pen (11 in fig. 6) on the hardcopy representation by recording movements of the pen with respect to the printed pattern (e.g., "If, for example, the customer orders two smoked salmon toasts, a two is written in front of the smoked salmon toast alternative..." col. 19, line 58 through col. 20, line 10; col. 17, line 49 through col. 18, line 60);

automatically sending the one or more edits made on the hardcopy representation, via wireless transmission, to a computer system (e.g., "If, for example, the customer orders two smoked salmon toasts, a two is written in front of the smoked salmon toast alternative. The two is recorded digitally by means of the device and is transferred to the kitchen..." col. 19, line 58 through col. 20, line 10; col. 18, lines 23-59); and

incorporating the one or more edits into an electronic version of the hardcopy representation (e.g., The customer's order is recorded digitally by means of the device and is transferred to the kitchen.)

Re claims 3-4 and 15-16: Fahraeus teaches recording the identification information comprises making a mark with the pen in the area with the identification information (col. 19, lines 58-67).

Re claims 9 and 19: Fahraeus teaches the identification information (e.g., the "MENU" in fig. 9) is on the paper at a location that does not include any portion of the printed pattern (5 in fig. 9).

Art Unit: 2876

Re claims 10 and 20: Fahraeus teaches the field (3) comprising a pattern of dots.

## Response to Arguments

- 5. Applicant's arguments filed May 27, 2006 have been fully considered but they are not persuasive.
- 6. In response to applicant's argument that

"Fahraeus does not disclose incorporating the number of dishes noted by the customer into an electronic version of the menu. In fact, it would not have been practical for the restaurant to allow every customer to edit the menu..." (see page 8, last 6 lines)

the examiner respectfully disagrees with the applicant and submits that, for example, if the customer orders two smoked salmon toasts, a two is written in front of the smoked salmon toast alternative and is recorded digitally into the computer then is transferred to the kitchen (col. 19, lines 62-65). That is "the two is recorded digitally," which is interpreted as "incorporating the one or more edits into an electronic version" as set forth in the claim(s). Accordingly, given its broadest reasonable interpretation, Fahraeus meets the claimed limitations.

#### Conclusion

Examiner's note: Examiner has cited particular columns and line numbers in the references as applied to the claims above for the convenience of the applicant. Although the specified citations are representative of the teachings of the art and are applied to the specific limitations within the individual claim, other passages and figures may apply as well. It is respectfully requested from the applicant in preparing responses, to fully consider the references in entirety as potentially teaching all or part of the claimed invention, as well as the context of the passage as taught by the prior art or disclosed by the examiner.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kimberly D. Nguyen whose telephone number is 571-272-2402. The examiner can normally be reached on Monday-Friday 7:30-4:30.

Art Unit: 2876

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael G. Lee can be reached on 571-272-2398. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
